

REMARKS

Claims 38-42 have been withdrawn and claims 1-37 and 43-47 remain in the application.

The Examiner required restriction to one of the inventions of:

- I. claims 1-37 and 43-47 directed to communication systems, a transmit signal processor, and an amplitude adjusting method; and
- II. claims 38-42 directed to an error signal generator.

In response, Applicant elects invention I and has, accordingly, withdrawn, without prejudice, claims 38-42 that are directed to invention II.

Respectfully submitted
for James C. Camp,

By

Joseph Compton
